**Subject:** Microsoft Settlement

To whom it may concern:

I find that the entire scope and promise of Microsoft's OS (Windows) to be that as a platform of functionality and control for a computer terminal. While Microsoft has chosen to add services provided by their internal development process or acquired from outside sources, they have also chosen a deliberate path to directly confront and destroy other equal opportunity developments, either through acquisition or pure malice. The Halloween documents should attest to the blatant malcontrived view of the intelligence and faith of the consumers, and further, the monopolistic instinct of the Microsoft Corporation. Please consider this e-mail to be a formal complaint of the proposed settlement - let unfettered justice be served.
